

PROJECT ZERO  
PERSPECTIVES:

# MAKING INNOVATING LEARNING

QUAKER VALLEY SCHOOL DISTRICT

MAY 12-13, 2017

PITTSBURGH, PA

This May, join educators from around the world for the Project Zero Perspectives conference in Pittsburgh, Pennsylvania. With the theme *Making-Innovating-Learning* we will explore the attributes of effective learning environments, with a special focus on creativity, the arts, and the maker movement.

The two-day conference will offer both large and small group settings in which to explore pedagogical tools, strategies, and frameworks developed at Harvard's Project Zero, each addressing one or more of the following strands:

- Encouraging Creativity and “Maker Thinking” in Children
- Making Learning and Thinking Visible
- Teaching for Understanding

On Friday, May 12, we will spend the entire day at **Quaker Valley Middle School** in Sewickley, PA. On Saturday, May 13, we will move to the beautiful **Carnegie Museums of Art and Natural History** and the **University of Pittsburgh's** famous Cathedral of Learning classroom building.

The Pittsburgh region has developed renown as a center for the maker movement. A preconference day at the **Children's Museum** on Thursday, May 11 will feature a deep dive into various maker ideas.

Project Zero leaders such as Edward Clapp, David Perkins, Ron Ritchhart, and Shari Tishman will be featured speakers throughout the weekend. Interactive courses, focusing on putting theory into practice, will be led by Project Zero researchers and practitioners from around the country and the world.
